

Preparing the design for coding

LESSON SUMMARY

KEY IDEAS TO REMEMBER

- ✓ From PS/Adobe XD/Figma to working code = the handover process
- ✓ Zeplin is one of the most well-known choices
- ✓ Zeplin is installed in Photoshop, it appears as a panel, and you mark certain layers for export
- ✓ Coders don't need your PSD or .XD files. They'll use Zeplin too.
- ✓ Zeplin is free to use and the pricing for more projects is very decent

calorii	339.6

Precomenzi disponibile

29 Sep

Mai sunt disponibile doar 12 comenzi

De ce precomenzi?

Suntem o firma micuta cu niste baieti si fete pasionati de mancarea sanatoasa, gustoasa si la un pret rezonabil.

Nu tinem nimic in stoc, toate comenzile sunt facute in ziua respectiva, cu ingrediente proaspete, de aceea **avem nevoie sa stim in avans** cate comenzi vom avea. In felul acesta asiguram

Preparing the design for coding

LESSON SUMMARY

KEY IDEAS TO REMEMBER

- ✓ Zeplin is not the only program that can prepare your design for coding, but it's my top choice
- ✓ The client and/or coders can use Zeplin in their web browser – installing Zeplin is not mandatory
- ✓ Most images and sometimes even content come from a server! You don't need to prepare ALL the images from a project and ALL the text layers.
- ✓ Your design is a blueprint. It contains precise instructions on how the design should look like. But it's not there to show the actual content of the website.
- ✓ Coding takes a lot of time, but if you prepare everything in Zeplin, you won't be asked for an icon 6 months after you completed the project.
